Thank you for entering all of your tract inspections each year. They are now loaded into a new LRM table and are available to foresters and regional managers.

Viewing Previous Year's Inspections

- In LRM, select a tract in the treeview:

- A child grid will show under each tract now. It contains the inspections entered since 2021 for that tract.

Tract Inspections

| YEAR | Date of Inspection | Inspected By | Tract OID | URL | Presence of Insects | Fire Damage |
|------|--------------------|--------------|-----------|---|---------------------|-------------|
| 2022 | 05/18/2022 | inspected | 5449 | | No | No |
| 2021 | 03/28/2021 | | 5449 | https://tlaforestry.sh | No | No |

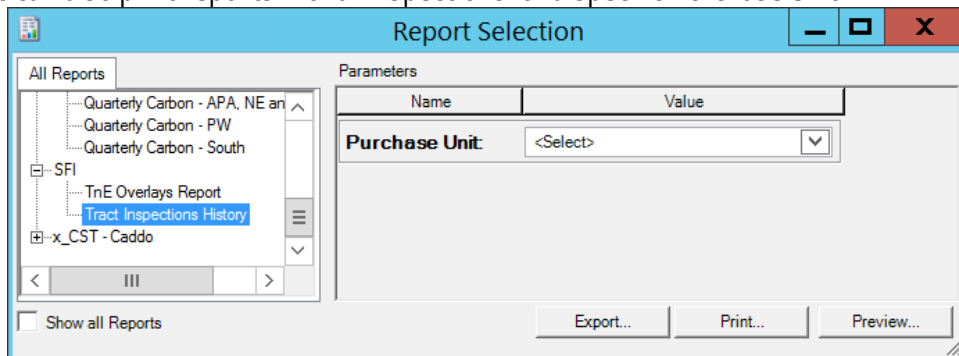

Entering Current Year's Inspection

- Annual Tract Inspections will be entered directly in LRM (for those not managed by TTG). **For that, right-click anywhere in the child grid and select "Insert" in the context menu.** Fill out all the fields and hit SAVE in the toolbar and post your version as you normally do for contracts.

Printing all the Inspections for a specific Tract

- You can also print reports with all inspections for a specific Purchase Unit:

For TTG-only

- TTG-managed tract inspections can be entered using the procedure above or you can still use the Map Portal or the FMA app, which should be available today.
- Managers, soon we'll send out a spreadsheet summary with all the 2022 Inspections for reference and actions on the comments.

Support

- For training and refresh on procedures: Open the [TTGLEARN](https://ttgforestry.com/ttglearn) PORTAL. Email to lrn.support@ttgforestry.com
